**06 November 2017**

**To whom it may concern**

**Re: Ernest Loveland- Neurologist's report.**

Ernest suffered a severe head injury which resulted in significant cognitive fall out. He initially struggled with mathematics, writing and using a computer. Since then he has made a remarkable recovery. He completed an internship in an IT company and has done several 3<sup>rd</sup> year exam papers successfully. I believe that he is ready to return to university. He may require some time to adjust to a high pressure environment, but cognitively he has improved dramatically.

Kind regards

Dr M Smith
